

Our Mission:

The Association for Molecular Pathology is a not-for-profit scientific society that advances the clinical practice, science, and excellence of molecular and genomic laboratory medicine through education, innovation, and advocacy to enable highest quality health care.

Dear Colleagues

This past year was a very eventful and exciting year for the Association for Molecular Pathology. AMP is now recognized as the go-to organization for all things molecular. Our members contribute widely to the molecular community and are representing AMP broadly across healthcare.

This past year, we have made some very significant contributions.

- Continued to expand our membership
- Enhanced our educational offerings and grew annual meeting participation
- Launched three affiliate societies outside the United States
- Became an independent society and established independent management
- Joined FASEB, established new collaborations, and strengthened ongoing alliances with key organizations
- Had tremendous impact nationally on important advocacy issues and priorities, including coverage and payment.
- Expanded access for trainees and others with restructured dues and increased philanthropy programs.
- Achieved a favorable decision from the U.S. Supreme Court on AMP v. Myriad
- Launched a new AMP logo
- Revamped our CHAMP listserv into a more user-friendly service.

And, these are only some of the highlights that you will see as you read through the annual report! If you want to read more in depth about any of AMPS activities, please visit the AMP website at www.amp.org. There, you can see details on all of AMP's strategic initiatives and outcomes.

It has been my privilege and pleasure to serve as AMP president for 2013. I am proud of the work we have done together and look forward to our continued successes.

Sincerely,

Jennifer L. Hunt, MD, MEd

International Affiliates

AMP welcomed three International Affiliate Organizations in 2013 — a first for the Association!

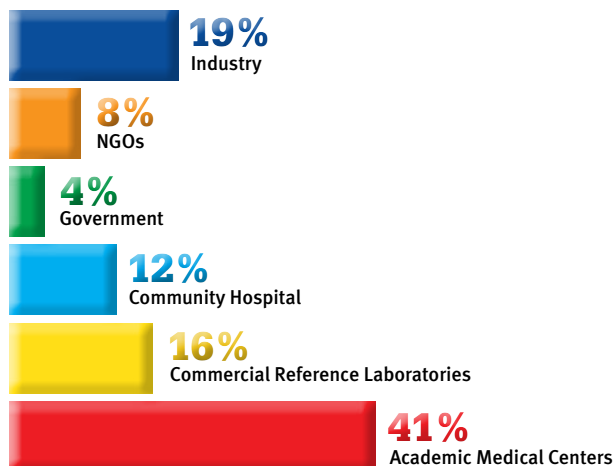

- ▶ The Hong Kong Society for Molecular Diagnostic Sciences, May 2013
- ▶ The Korean Society for Laboratory Medicine, June 2013
- ▶ The Molecular Pathology Association of India, June 2013

Public Policy

2013 was a busy year for AMP in the realm of public policy. Issuing nearly 20 position statements and papers, AMP addressed issues such as:

Coverage	Clinical Utility
Reimbursement	Laboratory Best Practices
Companion Diagnostics	Health IT
Practice Guidelines	Incidental Findings

Collaborations and Memberships

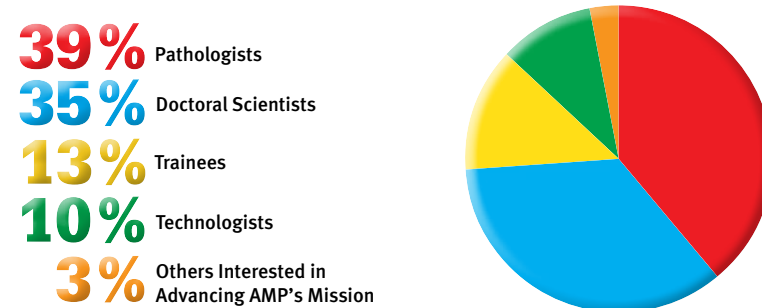

AMP's initiatives and growth led to membership and affiliation with key organizations:

- ▶ Constituent member of the Federation of American Societies for Experimental Biology (FASEB)
- ▶ Member of the Association of Pathology Chairs (APC) Pathology Roundtable
- ▶ Cooperating Society of the American Board of Pathology (ABP)
- ▶ IOM Roundtable on Translating Genomic-Based Research for Health
- ▶ Cancer Leadership Council

AMP continued to collaborate with all relevant associations on education and public policy initiatives. In addition, AMP maintained its memberships in:

- ▶ Personalized Medicine Coalition (PMC)
- ▶ Coordinating Council on the Clinical Laboratory Workforce (CCCLW)
- ▶ Intersociety Council for Pathology Information (ICPI - Associate Member)
- ▶ Intersociety Pathology Council (IPC)

Membership and Annual Meeting Overview

To help support emerging molecular pathology professionals from around the world, the Board reduced membership dues for all trainees and many regular members outside the U.S., beginning in 2014.

AMP ended the year with tremendous membership growth, jumping from 2,031 in 2011 to 2,162 in 2012 and 2,342 in 2013. Indicators suggest that the growth will continue for the coming years.

The Annual Meeting also continued to grow with more than 1,700 attendees in 2013. Also in attendance were nearly 200 exhibiting companies and their staff of roughly 1,300 individuals.
