

# Molecular Pathology Essentials: Principles & Practice

co-presented by AMP and AACC

Monday, May 17 (8:00 AM) 2010 to Wednesday, May 19, 2010 (3:00 PM)

Location: Hyatt Regency, Atlanta, Georgia, USA

Registration and travel information are at <http://www.aacc.org/events/meetings/Pages/5744.aspx>.

AMP members receive the member registration rate – use promotion code 105.

## Molecular Pathology Essentials: Principles & Practice

### Description

Molecular pathology testing continues to evolve and gain prominence as the preferred method of testing in the clinical laboratory. Building on the tremendous success of its first offering in 2008, this year's course will focus on current practices of molecular pathology, with an emphasis on case-based examples, technologies, and clinical applications.

### Content Level

The course content level will be *intermediate to advanced*; therefore, the program will be geared toward participants who have a basic knowledge of current theory and practice of molecular pathology, and who wish to increase their competence and skills in the newest principles and techniques in this field.

### Target Audience

Those who "must attend" this program include laboratory medicine physicians, directors, managers, supervisors, technologists, fellows, industry professionals, and others seeking to expand their knowledge and skills in molecular pathology testing.

### Course Synopsis

Experts in the field will give presentations on the role of molecular testing in:

- Genetic disorders
- Cancers
- Infectious diseases
- Pharmacogenetics
- Laboratory regulations
- The future of laboratory medicine
- And more!

### Organizing Committee

Linda Sabatini, Ph.D., HCLD (Co-chair)

Barbara Zehnbauer, PhD, FACMG (Co-chair)

Alexandra Valsamakis, MD, PhD

Kiang-Teck Jerry Yeo, PhD, FACB, DABCC
