The Association for Molecular Pathology is a not-for-profit scientific society that advances the clinical practice, science, and excellence of molecular and genomics laboratory medicine through education, innovation, and advocacy to enable highest quality health care.
Dear Colleagues,

The professional and personal diversity of our membership is one of our Association's greatest strengths. We are molecular pathologists, clinical laboratorians, clinical or basic research scientists, reagent/instrument manufacturers, bioinformaticists, teachers, mentors, students and public servants. In whatever capacity we may serve, we promote the highest quality of molecular diagnostics to improve patient care.

AMP is a community that fosters and advances excellence in innovation, clinical practice, translational research, education and therapy. This has been a very busy year for our organization. For the first time, attendance at our annual meeting exceeded 2,000 registrants, and membership has also continued to grow. We also added an International Affairs Committee and numerous working groups to address issues affecting the field, and began planning our first Global Congress.

AMP has been my professional home for nearly my entire career. It has been an honor to serve as your President, and I am proud of the work that we have accomplished together.

Sincerely,

Janina A. Longtine, MD
AMP President

Collaboration and Membership

AMP has vulnerabilities and affiliations with key organizations:

- Member of the Association of Pathology Chairs (APC) Pathology Roundtable
- Cooperating Society of the American Board of Pathology (ABP)
- IOM Roundtable on Translating Genomic-Based Research for Health
- American Association for Cancer Research (AACR)
- Member of the Federation of American Societies for Experimental Biology (FASEB)

To help align emerging molecular pathology professionals from around the world, the Board implemented a strategic initiative for fiscal matters and expansion of current initiatives, beginning in 2016. AMP has also been successful in increasing its membership growth, reaching 2,339 in 2014 and 2,365 in 2015. Membership growth is expected to continue for the coming years.

The Annual Meeting in 2016, with attendance exceeding 1,000 individuals for the first time. Active participation in national initiatives continues to grow, with AMP now having more than 1,000 members.

Public Policy

AMP’s efforts in 2015 supported emerging molecular pathology professionals from around the world. These efforts included working closely with key organizations on a variety of initiatives, including:

- Molecular Diagnostic Perfect Storm White Paper
- Genomic Sequencing Procedures: Cost and Value Models
- Oversight of Next Generation Sequencing
- Oversight of Next Generation Sequencing
- Coverage and Reimbursement
- Proposed FDA Oversight of LDPs
- CLIA Modernization for LDPs
- Direct Access Genetic Testing
- Laboratory Best Practices
- Practice Guidelines
- And Much More

AMP’s educational initiatives continue to reach global proportions. In 2015, AMP collaborated on several molecular diagnostic-related conferences in Singapore, India, Sri Lanka, Brazil, and South Korea. In addition, the first International Showcase event was held at the AMP 2015 Annual Meeting.

AMP’s Fiscal Footing

AMP’s fiscal footing is solid, allowing it to dedicate appropriate resources to its strategic initiatives.
