

Dear AMP Committees,

I would like again to express my gratitude for selecting me for the Award. Though, I made it the very last minute, but I am very happy that I attended. It was an honor and pleasure meeting you all.

My two-day trip was very short, however, it was very productive; worth the long trip. During the meeting, I attended a lot of informative talks, three of them particularly were of my very interest as they were related to my current research areas and we exchanged a lot of information after the talks. Also, some of the posters were the same. Huge up to dated information in the field. I also made some new connections that I am hoping to open other doors for establishing connections between our labs. Additionally, I have exchanged contact information with the companies that were there, since I am contributing in establish a Molecular Diagnostics lab in a new cancer center at the University I am working at, it was very beneficial to explore the market.

I am also giving a seminar soon at University and Hospital about the meeting and the Association of the Molecular Pathology, in a hope that I can encourage our pathologists to do a membership.

Thank you again and looking forward to meeting you all again next year.

Regards,
Shara Nizamaddin
